PROFESSIONAL SUMMARY

Full Stack Engineer and Associate Team Lead with 3 years of end-to-end product delivery experience at Squbix Digital. Specialised in React.js, React Native, Node.js, NestJS, along with advanced frontend tooling including Redux, RTK Query, Webpack, Rollup, and React-Window, with a strong track record of integrating AI into production systems across healthcare SaaS and fintech platforms.

Rebuilt a digital wallet in 10 days, reduced EMR load time by 53%, and shipped an AI-powered clinic management system with a team of 8 engineers in 5 months. Early adopter of AI-assisted development using Cursor, Claude, Amazon Q, and Kimi K2 daily to accelerate delivery and improve engineering efficiency.

Targeting senior engineering and tech lead roles at product-first companies.

WORK EXPERIENCE

Associate Team Lead & Manager — Squbix Digital Pvt. Ltd.

Apr 2025 – Present

- Led a **cross-functional team of 8** (frontend, backend, mobile, QA, design, AI) to architect and deliver **SquMed HMIS**, an AI-powered clinic management platform, in **5 months**.
- Designed system **HLD and LLD**, implementing a **modular micro-frontend architecture** with shared components across React.js and React Native.
- Delivered production-grade AI features including **conversation-to-EMR transcription**, voice-editable EMR, **DDI checks**, and patient-specific dosage recommendations.
- Contributed as a **Full Stack Engineer** to a fintech AML/AUSTRAC compliance platform using React.js, NestJS, Refine, TanStack Query, and Dapr.
- Drove adoption of **AI-assisted development workflows**, improving team productivity using tools like Cursor, Claude, Amazon Q, and Copilot.

Senior Software Developer — Squbix Digital Pvt. Ltd.

Apr 2024 – Mar 2025

- Improved EMR performance by **53%** (1.5s → 0.7s) using React optimisation techniques including virtualisation, memoisation, and API caching.
- Led development of the **Billing Module** for Augastam HMIS (Akhil Systems), covering billing workflows, tariff systems, and payer management.
- Architected a **dual-application deployment** using Nginx reverse proxy to support separate Billing and OPD systems under a unified endpoint.
- Built a **configurable print engine** enabling custom prescriptions, invoices, and forms — enhancing product adaptability across hospitals.
- Designed a **split-view EMR interface** with configurable layouts, improving usability for clinicians handling multiple workflows.
- Integrated AI features including **speech-to-text EMR** and real-time clinical conversation analysis.
- Mentored junior developers and contributed to **architecture and product decisions** in collaboration with PMs.

Software Developer — Squbix Digital Pvt. Ltd.

Oct 2023 – Mar 2024

- Rebuilt **Sqwallet** (digital wallet app) in **10 days** using AI-assisted development, setting a new internal delivery benchmark.
- Developed a **configurable form builder** (Forms & Webparts) for HMIS workflows, supporting dynamic fields and custom dropdowns.
- Acted as a **client-facing engineer**, receiving strong feedback for rapid onboarding and product understanding.
- Independently built and shipped **three full-stack demo applications** within one month each.

Software Engineering Intern — Squbix Digital Pvt. Ltd.

Jul 2022 – Jan 2023

- Contributed to **MetaMUI**, a blockchain-based offline payments platform, as part of the React Native team.
- Developed and published **react-native-bluetooth-module** on npm, enabling peer-to-peer offline payments via Bluetooth.
- Improved payment UX by replacing QR-based flow with **direct Bluetooth device pairing**.
- Worked across **React Native, AWS Lambda, and Android native**, gaining early exposure to cross-platform and fintech systems.

TECHNICAL SKILLS

Frontend: React.js, React Native, Redux Toolkit, Redux, RTK Query, TanStack Query, React Hook Form, Zod, Axios, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, shadcn/ui, Radix UI, React-Window, Framer Motion, Recharts, Webpack, Rollup, Vite, Micro-frontends, Module Federation

Backend: Node.js, NestJS, Express.js, REST APIs, Swagger/OpenAPI, MongoDB, PostgreSQL, Redis, Firebase, Drizzle ORM, Dapr (Microservices), Event-driven Architecture

AI & Applied AI: Cursor, Claude, Kimi K2, Amazon Q, OpenAI Codex, GitHub Copilot, LLM Integration (API-driven), Speech-to-text Systems (Whisper), NLP Chatbots, OCR (Tesseract.js), Document Intelligence (PAN/Aadhaar extraction), Conversational EMR, Clinical AI (DDI checks, dosage systems)

Architecture: HLD/LLD, System Design, Microservices Architecture, Monorepo (Turborepo/Nx), Multi-repo, Micro-frontends, Scalable Frontend Architecture, API Design

Security & Auth: JWT Authentication, RBAC, HMAC Signing, Access/Refresh Token Flows, Cookie-based Auth, Secure API Design, Helmet, Bcrypt

DevOps & Cloud: Docker, Docker Compose, GitHub Actions, Nginx (Reverse Proxy), CI/CD Pipelines, AWS (EC2, S3, Lambda), Oracle Cloud (Object Storage), Firebase Hosting, Netlify, Environment-based Config

Platform & Delivery: Progressive Web Apps (PWA), Electron (Desktop Apps), Multi-environment Builds, Feature Flags

Performance & Optimisation: Code Splitting, Lazy Loading, Memoisation, Virtualisation (React-Window), API Caching, Bundle Optimisation, Rendering Optimisation, Web Performance Tuning

Developer Tools: Postman, Figma, JIRA, Refine.dev

Data (Secondary): Python, SQL, Power BI, Spark, Hadoop, Snowflake

EDUCATION

B.Tech. in Computer Science & Engineering 2019 – 2023

Silicon Institute of Technology, Bhubaneswar

Class XII (CBSE) 2019

Kendriya Vidyalaya No.1, Bhubaneswar

KEY PROJECTS

[SquMed HMIS — AI-Powered Clinic Management System](#)

Built a full-stack **healthcare SaaS platform** with advanced **AI-driven clinical workflows** including **voice-to-EMR transcription (Whisper)**, **OCR-based document parsing**, **NER-style data extraction**, **DDI checks**, and patient-specific dosage recommendations.

Implemented using React.js, React Native, Node.js, and Firebase with **micro-frontend architecture**, **RBAC-based access control**, and secure API integrations. **Delivered in 5 months** with a team of 8.

[Vigilend — Fintech AML Compliance Platform \(Australia\)](#)

Worked as a **Full Stack Engineer** on a **fintech AML compliance platform** for real estate agents to screen buyers and ensure **AUSTRAC Tranche 2 compliance**. Built using React.js and NestJS with **PostgreSQL**, **Drizzle ORM**, **Dapr**, **Refine**, and **TanStack Query**.

Contributed to **secure, ISO-compliant system design**, implementing regulatory workflows, risk screening pipelines, and scalable backend services for handling compliance checks and transaction data.

[Augastam HMIS — Hospital Information & Billing System](#)

Enterprise-grade **HMIS SaaS platform** for Akhil Systems Pvt. Ltd., featuring a **configurable form builder**, **split-view EMR**, **custom print engine**, and billing module. Integrated **AI-powered clinical conversation tools** and deployed across multiple hospital clients.

[rn-bluetooth-connect — React Native Bluetooth Module](#)

Developed and published a **React Native native module** enabling **offline peer-to-peer communication** via Bluetooth. Built for fintech use cases and released as a **public GitHub project**.
